About Me

I easily find common language with the team. I love being in a development atmosphere and experienced developers Interested in full-featured development in particular Node.js interface technologies also interested in reacting to native and Electron.js and Flutter if necessary he is ready to mentor the team. At the moment I am actively working in the blockchain area on the frontend (web3) side, I am also actively studying and developing smartcontacts on solidity in ethrereum

At the moment I am actively working as a blockchain developer on rust and also working as a backend developer on rust

Geographically I am now in Bishkek (Kyrgyzstan). Therefore preferred the way to conduct an interview for me will be - a video call. You can write me in advance in mail or telegram

EXPERIENCE

Solana devs

AUGUST 2024 - Current job

Position: as: **Rust Solana Developer**

Here I will work as a solana developer on rust and my main task is to work with dex (moonshot and pumpfun) to obtain state, calculate the favorable price of tokens and the possibility of swapping tokens

Development of back end parts on actix web. Interaction with solana smart contracts

List of technologies with which I am:

● Splana SDK ● Cargo ● SPL token ● Actix web ● Rust

frakt.xyz

MAY 2023 - AUGUST 2024

Position: ed as: **JavaScript / Rust Solana Developer**

Here I got a cool experience working on the Solana network. Also experience in connecting smart contracts on Solana and web applications. Worked on Optimizing and improving the ui in collaboration with smarcontract. I also connected the ui part with the web api back end

Also here I gained experience working on a backend node with BRC2/ORC20 in the Bitcoin network

I often encountered problems of optimizing renders at the frontend and validating data before sending it to a smart contract

List of technologies with which I am:

● Node.js ● React.js ● TypeScript ● Solana web3.js ● Zustand.js ● REST API ● Jest ● Anchor ● Rust ● Mongo

xfamily.io

AUGUST 2021 - APRIL 2023

Position: ed as: **Node.js Developer**

In this company I worked as a node.js backend developer on a product project for swap cryptocurrency

I worked with an API database and also maintained a large portal on the best solutions for cryptocurrency swaps

Got good experience working in web3 and interacting with smart contracts.

List of technologies with which I am:

● Node.js ● RabbitMQ ● TypeScript ● Web3.js ● Redis ● REST API ● Jest ● Mongo

Ownix.com

MARCH 2020 - AUGUST 2021

Position: ed as: **Node.js Developer**

In this company I worked as a node.js developer in a startup selling NFTs

Here I got great knowledge on database design and various ways of connect with clients

I also began to understand better how to work with microservices. As well as third party services

List of technologies with which I am:

● Node.js ● RabbitMQ ● TypeScript ● Postgres ● Redis ● REST API ● Websocker ● SSE

P2P.org

AUGUST 2019 - MARCH 2020

Position: ed as: **Front-End Developer**

In this company I worked as a Front-End Developer developer in a large products company

Front end development for company applications. Connecting to the backend.

Typical work for a front-end developer

List of technologies with which I am:

● Node.js ● React.js ● TypeScript ● Vue.js ● Redux ● REST API ● Ghost.js

Zensoft.io

DECEMBER 2017 - AUGUST 2019

Position: ed as: **Front-End Developer**

Development of complex SPA and backend, team development. Support for terrible Legacy code and writing a new one.

Teamwork with Back-end, Front-End, Mobily developers, PM - manager and QA. Reached for Team - Lead position.

My first experience working in an out source company. Also my first experience working on the backend on node.js

List of technologies with which I am:

● Node.js ● React.js ● TypeScript ● Redux ● REST API ● Jest ● Express.js ● TypeORM ● Postgres

Svetofor.info

JANUARY 2015 - DECEMBER 2017

Position: ed as: **Front-End Developer**

My first experience in office with a team. I worked with BackEnd developer

first job where I gained basic knowledge about team development

List of technologies with which I am:

● HTML5 ● CSS3 ● JavaScript ● WordPress ● DOM API

General

SKILLS

In general, if you add up all my experience, it turns out to be about 8 years of development. I started working at the university in 2016 and to this day I work as a programmer. I have always been interested in development approaches such as SOLID KISS DRY YAGNI. I also study rust and try to study working with computer memory and low-level development in my free time. I have experience with basic tools for tracking code review tasks and development planning.

list of technologies with which I am:

●Git ●Linear ●GitLab ●GitHub ●ClickHouse ●Google Meet ●Slack ●Zoom ●Discord

Rust

After 6 years of developing in java script, I successfully switched to rust development. At this moment I have more than 1.5 years of experience as a blockchain developer

List of technologies with which I am:

●Core lib ●Anchor ●Actix-Web ●Rust Solana ●Solana sdk

Back End

At the moment, my active direction of development as a developer is back end development. I am actively studying and developing backend projects on node.js. I am actively studying microservice architecture. In total, my experience working on the backend is about 3 years

I also love devops technologies (docker, jenkins, kubernetes and ci/cd)

Lately I've been using nest.js most often. But I also have experience working with express.js and koa.js in real projects.

list of technologies with which I am:

●Nest.js ●Express.js ●Postgres ●Mysql ●TypeORM ●RabbitMQ ●Elasticsearch ●Redis ●MongoDb ●TypeORM ●SQL ●Docker ●TypeScript ●GraphQL ●Swagger ●Docker ●Docker-compose

Front End

I have been working as a frontend developer for about 4-5 years and at the moment I am not developing in this direction. In my experience, I was also a middle senior team lead tech lead developer. But front-end development gave me a lot of experience with JavaScript/TypeScript. My main tools are React.js and Vue.js

I have experience developing complex cross-browser responsive web applications. Using different technologies and approaches to different projects

List of technologies with which I am:

●React.js ●Next.js ●Gatsby.js ●Redux ●Mobx ●Vue.js ●Vuex ●Nuxt.js ●Zustand ●CSS ●Styled Components ●CSSinJS ●JSS ●JQuery ●REST api ●Apollo GraphQL
